Work done on June 25, 2026

MATERIAL LIFT

Picked up necessary equipment and materials for material lift. Positioned lift and secured. Rigged and pulled cab walls back onto platform. Furnished and installed additional angle supports and steel brackets; properly secured damaged cab walls to main steel platform. Repaired and replaced damaged section of mesh on wall. Repaired lower level swing doors. Realigned swing door keepers and replaced damaged hardware. Heated and straightened bent safety interlock mount. Performed complete door adjustment and alignment. Cleaned fallen debris and garbage from pit and below lift. Returned lift to service.
